SUMMARY

I am an enthusiastic and self-motivated engineering student with a good understanding of programming and problem-solving. I enjoy working on real-world projects that help me learn and grow. I have basic knowledge of core computer science subjects and I keep improving my skills through hands-on practice. I'm looking for a full-time opportunity where I can learn more, contribute to useful projects, and become a better software engineer every day.

EDUCATION

SCTR's Pune Institute of Computer Technology Branch IT CGPA: 9.51	2024 – 2027
Government Polytechnic Dharashiv Branch CS Percentage: 94.34%	2021 – 2024

TECHNICAL SKILLS

Languages: C, C++, Java, Python, JavaScript

Web Technologies: HTML5, CSS3, React.js, Node.js, Express.js, Spring Boot, RESTful APIs, Tailwind CSS

Databases: MySQL, PostgreSQL, MongoDB

Cloud & Tools: AWS (Lambda, EventBridge, CloudTrail, DynamoDB, API Gateway), Git, GitHub, JWT Authentication, Cloudinary, DJL/ONNX Runtime

EXPERIENCE

AWS Student Builder Group – PICT <i>Project Contributor (Intern)</i>	<i>Pune, Maharashtra</i> <i>February 2026 – April 2026</i>
--	---

- Designed and developed a serverless full-stack cloud application automating Amazon S3 storage lifecycle management with event-driven backend workflows and a React frontend
- Worked in sprint-based Agile cycles, raising pull requests on GitHub and incorporating code review feedback into daily workflow
- Built a React-based monitoring dashboard consuming REST APIs for real-time storage analytics and cost optimisation; deployed on AWS and Vercel following cloud security and serverless architecture best practices

Tech Stack: *AWS Lambda, EventBridge, CloudTrail, DynamoDB, API Gateway (REST), Python, React.js*

PROJECTS

FindMyShot – AI Face Recognition Photo Finder	<i>Live Demo</i>
--	------------------

- Built a full-stack AI-powered application enabling users to locate their photos in bulk albums using face recognition (**DJL, ONNX Runtime**), architected for scalable production deployment
- Engineered **REST APIs** in **Spring Boot (Java)** with async processing; built a **React.js** frontend and integrated **Cloudinary CDN** for scalable image storage and retrieval

Tech Stack: *Spring Boot, Java, DJL/ONNX Runtime, React.js, MongoDB, Cloudinary*

HackNest – Hackathon Team Formation & Collaboration Platform *Live | May 2026 – July 2026*

- Developed a full-stack platform for hackathon team formation, enabling users to discover hackathons, build teams, and recruit members
- Built the backend using **Spring Boot**, **MongoDB**, and **JWT Authentication**, with a responsive **React.js** frontend featuring search, recommendations, applications, invitations, ratings, and analytics

Tech Stack: *Spring Boot, MongoDB, JWT, React.js*
